KASIMA BULK MARKET SITE HANDED OVER TO CONTRACTOR

Mongu Municipal Council (MMC) has handed over the site for Kasima Bulk Market which will be constructed at a cost of K3.8 million in phase one (1).

The contractor has since mobilized on site and is expected to construct a market shelter of 800 square meters and a storage shade of the same size in two months' time.

Phase two (2) will include construction of a Perimeter Wall Fence and paving the area. When completed, KASIMA Bulk Market will accommodate bulk traders from within and outside Mongu district including traders from Kashumba Market. The public may wish to know that Kashumba is an illegal market which is not run by the Local Authority in Mongu.

The Local Authority had engaged traders from Kashumba on its plan to relocate them to the Bulk Market once it's completed.

Recently, the Ministry of Local Government and Rural Development came to the aid of the Council and injected a K4 million towards the construction of the bulk market.
